

RAMPART
WE EQUIP YOUR MISSION

CAPABILITIES OVERVIEW

THE WORLD'S BEST OPERATIONAL EQUIPMENT. INDUSTRY LEADING CUSTOMER SERVICE.

Rampart is an industry leading single source provider of operational equipment. We offer access to a selection of premiere brands and products, world-class subject matter experts, and industry leading customer service. Now, in our fifteenth year, we have built a customer base of hundreds of agencies and forged strong relationships with leading equipment manufacturers from around the world.

EQUIPMENT SOLUTIONS

Our experts are committed to serving the end-user with the world's best products. If you're unsure of what you need, our experts work with you to find the right solution.

CUSTOMER SERVICE

Our top priority is to provide the highest level of customer service. Our team is dedicated to providing on time, on budget and on target solutions.

SUBJECT MATTER EXPERTS

We have subject matter experts who can help and assist every step of the way. From initial request, to post-contract delivery, warranty, repair and anything else that might come up.

WHO WE SERVE

- ✓ **Law Enforcement**
- ✓ **Military & Special Forces**
- ✓ **Corrections**
- ✓ **Public Safety**
- ✓ **Public Security**

TRY BEFORE YOU BUY! TEST & EVALUATION PROGRAM

- 1. Non-Destructive:** Rampart USA will send prospective agencies a sample to get a hands-on feel for quality. The product is then sent back after an evaluation period.
- 2. Destructive:** Purchase a sample product at a reduced rate. The product is then yours to keep to fully test out its capabilities and take the required time to make a confident buying decision.

A next generation, anti-fog, force-on-force helmet designed specifically for use in scenario-based training with marking rounds and FoF ammunition.

3

DEFILADE Protection Systems is dedicated to enhancing law enforcement safety through innovative protective gear designed for modern policing.

5

Schubert, worldwide leaders in head protection, produces advanced helmets for military, law enforcement, and public safety professionals.

9

Genasys develops advanced communication systems, including LRAD (Long Range Acoustic Devices), for critical incident response and public safety.

11

DFNDR Armor equips law enforcement professionals with advanced, reliable body armor for critical protection in the field.

12

LTC is a leading manufacturer of lightweight, high-performance armor plates, providing ballistic protection for military and law enforcement personnel.

13

Galvion specializes in protective head systems and armor, offering advanced ballistic helmets with cutting-edge, modular designs for tactical operations.

14

Scorpion PPE, experts in blunt trauma protection, manufactures advanced guards designed to absorb and dissipate impact.

15

Instant Armor provides rapidly deployable ballistic shields for immediate protection in high-risk situations.

16

The WARQ Pro force-on-force helmet was designed specifically for Law Enforcement and Military use in training with marking rounds and FoF ammunition. Its unique ventilation system provides the best anti-fog capabilities on the market.

**MODERN POLICING.
MODERN PROTECTION.**

Full impact protection without aggressive presentation. The DDS's ability to fit underneath the uniform results in officers having a low-profile silhouette. This gives users full blunt impact protection while creating a less aggressive presentation in crowd control situations.

THE PROTECTION TO SERVE.

DEFILADE DDS is protected by D30®'s ground-breaking impact technology. D30® produces the thinnest, most advanced protection against impact and blunt force trauma. Built with law enforcement in mind, its low-profile design & unmatched technology is a perfect solution for the challenges facing modern policing.

CEW TESTING CHAMBER

The DEFILADE CEW Testing Chamber allows CEW users to conduct daily function tests, scheduled downloads or test malfunctioning cartridges safely and effectively.

KEY FEATURES:

Probes from accidental discharges are captured and contained within the testing chamber.

The chamber decreases decibel output by over 50%, reducing disruptions to other staff during scheduled downloads.

The operator can visually see the arcing during testing without needing to look directly at the CEW, protecting the user.

Schubert is a world market leader when it comes to head protection systems including motorcycle, formula 1, military, police, work safety and firefighting with a yearly output of over one million helmets.

P100N

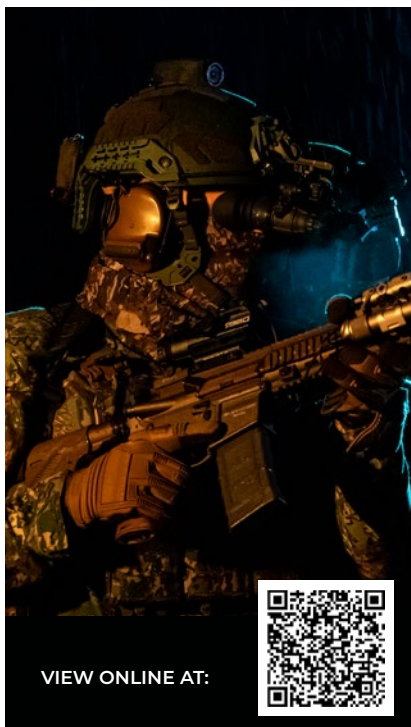

PUBLIC ORDER HELMET

A lightweight, fire and chemical resistant helmet with optimum impact-absorbing properties. Its modular design allows for easy customization depending on operational need.

The P100N helmet from Schubert combines multiple layers of aramid composite with an EPS foam backing. When the helmet is attacked, the exterior aramid fiber layers delaminate (or separate), dissipating some of the force before it reaches the interior EPS foam. The process of delamination also means that any damage to the helmet is localized and ensures that the protective ability of the helmet will not be compromised after a single impact.

M100

BALLISTIC HELMET

A modern combat helmet, the M100 excels in both comfort and ballistic defense. Its innovative open architecture rail system and customizable interior deliver exceptional battlefield performance.

The M100 offers high ballistic protection, certified to meet or exceed NIJ Level 3A standards, ensuring robust defense against a wide range of ballistic threats in combat situations. An adjustable interior, provides a customized fit for each wearer and ensures both comfort and stability during prolonged dynamic activities. The M100's open architecture rail system enhances its adaptability, allowing for the attachment of various mission-critical accessories. The helmet's meticulous design places a premium on wearer comfort, reducing fatigue and optimizing focus and performance during missions.

P100N

A multi-layered, lightweight, chemical and flame resistant riot control helmet.

-  Standard visor
-  Non-adjustable
-  Highest level of head protection
-  Standard anti-fog visor
-  **Lowest cost option**
-  No laser protection

P100N - PIN LOCK

A moisture absorbing anti-fog insert for best visibility in all weather conditions.

-  Pin lock visor
-  Non-adjustable
-  Highest level of head protection
-  **Best anti-fog visor**
-  Slight price increase
-  No laser protection

P100N A - PIN LOCK ADJUSTABLE

Adjustability = versatility. Long term cost savings, purchase fewer variety of sizes.

-  Pin lock visor
-  **Adjustable helmet**
-  Highest level of head protection
-  **Best anti-fog visor**
-  Slight price increase
-  No laser protection

P100N LPA - PIN LOCK ADJ. + LASER

Adjustable helmet with built-in laser protection that slides up & down as needed.

-  Pin lock visor
-  **Adjustable helmet**
-  Highest level of head protection
-  **Best anti-fog visor**
-  Highest price option
-  **Built-in laser protection lens**

LRAD
by Genasys

Genasys LRAD (Long Range Acoustic Device) systems deliver live or recorded voice messages with exceptional clarity for any operational scenario. Optimized to the primary range of hearing, LRAD's Advanced Driver and Waveguide Technology ensure every broadcast is clearly heard, even above crowd, engine, and background noise.

LRAD 100X

The LRAD 100X is a portable, self-contained communication system for on-scene and tactical use. It offers unparalleled vocal clarity and is up to 30 dB louder than megaphones, and other vehicle P.A. systems.

- **Superior Communication Range:** The LRAD 100X can communicate clearly over distances up to 600 meters.
- **Enhanced Safety and Compliance:** Helps enforce compliance and enhances safety during crowd control, search and rescue operations, and other critical missions, reducing the need for physical force.
- **Battery-Powered Operation:** The LRAD 100X operates on 8 hour rechargeable batteries, providing flexibility and ease of use in the field without the need for constant power supply.

LRAD 450XL

The LRAD 450XL utilizes technology developed and patented by Genasys Inc. to provide the audio output of larger acoustic hailers almost twice its size and weight, while delivering the same outstanding vocal clarity inherent in all LRAD systems.

- **Extended Communication Range:** Can project clear and intelligible communication over distances up to 2,000 meters, making it ideal for large-area coverage and long-range communication needs.
- **Rugged Design:** Rugged, military-tested construction built for all-weather use, ensuring reliable performance in various environments and weather conditions.
- **Powerful and Directional Sound:** Emits focused sound beams with high intensity and variable beam width for extended coverage, allowing operators to target specific areas or individuals with precision while avoiding collateral disturbance.

DFNDR Armor is committed to providing state-of-the-art personal protection solutions through continuous innovation and dedication to quality. Their mission focuses on providing state-of-the-art body armor that ensures the highest level of safety and tactical superiority for those who protect and serve.
