

RAMPART
WE EQUIP YOUR MISSION

CAPABILITIES OVERVIEW

THE WORLD'S BEST OPERATIONAL EQUIPMENT. INDUSTRY LEADING CUSTOMER SERVICE.

Rampart is an industry leading single source provider of operational equipment. We offer access to a selection of premiere brands and products, world-class subject matter experts, and industry leading customer service. Now, in our fifteenth year, we have built a customer base of hundreds of agencies and forged strong relationships with leading equipment manufacturers from around the world.

EQUIPMENT SOLUTIONS

Our experts are committed to serving the end-user with the world's best products. If you're unsure of what you need, our experts work with you to find the right solution.

CUSTOMER SERVICE

Our top priority is to provide the highest level of customer service. Our team is dedicated to providing on time, on budget and on target solutions.

SUBJECT MATTER EXPERTS

We have subject matter experts who can help and assist every step of the way. From initial request, to post-contract delivery, warranty, repair and anything else that might come up.

WHO WE SERVE

- ✓ **Law Enforcement**
- ✓ **Military & Special Forces**
- ✓ **Corrections**
- ✓ **Public Safety**
- ✓ **Public Security**

TRY BEFORE YOU BUY! TEST & EVALUATION PROGRAM

1. Non-Destructive: Rampart USA will send prospective agencies a sample to get a hands-on feel for quality. The product is then sent back after an evaluation period.

2. Destructive: Purchase a sample product at a reduced rate. The product is then yours to keep to fully test out its capabilities and take the required time to make a confident buying decision.

WARQ is a manufacturer of advanced force-on-force protective equipment for law enforcement and military training. The WARQ helmet platform is recognized as the most advanced force-on-force helmet system on the market.

VIEW ONLINE AT:

WARQ GEN 2

THE MOST ADVANCED **FORCE-ON-FORCE HELMET**
JUST GOT BETTER.

ANTI-FOG SYSTEM

Advanced ventilation system expels body heat and hot air exhaust before it fogs the lens. Maintains clear vision for safer, uninterrupted training.

UNMATCHED SITUATIONAL AWARENESS

Extra-wide 210° lens, open venting improves hearing and communication.

NEW! BUMP CERTIFIED

Only bump-certified force-on-force helmet on the market, third party lab tested to EN 1385 impact protection standards.

ONE-SIZE FITS ALL

New adjustable ratcheting system for a more secure and stable fit.

MADE IN EUROPE.
5 YEAR WARRANTY.

WHAT'S NEW IN GEN 2?

- **Bump Certification:** Now certified to European blunt impact standards for added safety and protection.
- **D30® Halo 7 Padding:** Industry leading impact padding from D30 for improved impact absorption and increased comfort.
- **Fiberglass-Reinforced Shell:** Stronger and lighter shock absorbent external shell.

CERTIFIED SAFETY

Third Party Laboratory Tested to the following safety certification standards:

- **EN 1385:** Blunt impact helmet standard for impact absorption, retention, and coverage
- **EN 166A:** High-impact lens rating for resistance to high-speed projectiles
- **ASTM F1776:** U.S. standard for helmets used with marking / paint round

FORCE-ON-FORCE GLOVES

- **Enhanced Protection:** Designed with reinforced padding across critical areas like the back of the hand, knuckles, and fingers.
- **Flexibility and Dexterity:** Built with flexible materials for unrestricted mobility and precision.
- **Reliable Grip:** High-friction palm materials provide a secure grip in various conditions, ensuring control over firearms and equipment.
- **Optimized Trigger Finger:** Lightweight padding on the trigger finger, allows for precise control and accuracy.
- **Quick and Secure Fit:** The adjustable velcro wrist closure offers a secure fit during dynamic movements.

FORCE-ON-FORCE GROIN GUARD

A fully adjustable unisex groin protector designed for force-on-force training with marking rounds. The WARQ groin guard offers strategically sewn padding that delivers protection without sacrificing mobility. Lightweight protection that easily fits over uniforms or other attire, making it ideal for force-on-force training exercises.

Unit Solutions specializes in non-lethal training systems for law enforcement and military professionals. Their UNIT4 Training Rifle delivers realistic AR-platform handling and recoil while remaining classified as a non-firearm—enabling safe, cost-effective force-on-force training in any environment.

UNIT 4 RIFLE

The UNIT4 Training Rifle is a dedicated, non-lethal AR-platform training system designed for safe, realistic, scenario-based force-on-force exercises. Powered by CO₂ TPAK cartridges, it delivers authentic recoil and true AR handling without the regulatory burdens of a firearm. Made in USA.

- **ATF Non-Firearm Classification:** No FFL required, simplifying purchase, storage, and deployment in any training environment.
- **Realistic AR Ergonomics:** Forged aluminum receivers and full accessory compatibility for true-to-duty weapon handling.
- **Pneumatic CO₂ Operation:** Delivers authentic recoil and semi/full-auto cycling for effective scenario training.
- **Cost-Effective Ammunition:** Proprietary TPAK cartridges, available in single-use and refillable options, offer savings of up to 70 cents per round compared to traditional force-on-force marking rounds. Preloaded CO₂-powered cartridges deliver 30 non-lethal rounds per magazine.
- **Safe Anywhere Training:** Classification as a non-firearm allows for training in schools, offices, vehicles, and other real-world environments where live firearms or converted weapons aren't permitted.

High Gear is the original force-on-force training suit, designed for law enforcement, military, and self-defense professionals. Lightweight, durable, and highly mobile, it set the standard for realistic scenario-based training.

VIEW ONLINE AT:

IMPACT REDUCTION SUIT

Designed for full mobility and protection. Weighing just 7.5 lbs, it uses smart foam and molded plastics to absorb impact without limiting speed or agility. Ideal for CQC, PSD, defensive tactics, and scenario-based training, it enables realistic strikes, grappling, and flex-cuffing while minimizing injury risk.

- **Lightweight and Flexible:** Weighs only 7.5 to 9.8 lbs, significantly lighter than competitors.
- **Full Range of Motion:** Supports grappling, striking, cuffing, and dynamic scenario training.
- **Impact Reduction Technology:** Smart foams dissipate force while maintaining biofeedback for realistic training.
- **Versatile Scenario Training (STXs):** Suitable for CQB, PSD, and other dynamic training environments, using both training weapons and empty-hand techniques.
- **Cuff Compatibility:** Allows the role-player to be flex-cuffed or handcuffed, enabling realistic training scenarios that mirror real-life confrontations.
- **Rapid Suit-Up Time:** Takes just over 3 minutes to gear up, minimizing downtime during training sessions.

FR MODELS AVAILABLE

MODERN POLICING. MODERN PROTECTION.

Full impact protection without aggressive presentation. The DDS's ability to fit underneath the uniform results in officers having a low-profile silhouette. This gives users full blunt impact protection while creating a less aggressive presentation in crowd control situations.

THE PROTECTION TO SERVE.

DEFILADE DDS is protected by D30®'s ground-breaking impact technology. D30® produces the thinnest, most advanced protection against impact and blunt force trauma. Built with law enforcement in mind, its low-profile design & unmatched technology is a perfect solution for the challenges facing modern policing.

CEW TESTING CHAMBER

The DEFILADE CEW Testing Chamber allows CEW users to conduct daily function tests, scheduled downloads or test malfunctioning cartridges safely and effectively.

KEY FEATURES:

Probes from accidental discharges are captured and contained within the testing chamber.

The chamber decreases decibel output by over 50%, reducing disruptions to other staff during scheduled downloads.

The operator can visually see the arcing during testing without needing to look directly at the CEW, protecting the user.

Schubert is a world market leader when it comes to head protection systems including motorcycle, formula 1, military, police, work safety and firefighting with a yearly output of over one million helmets.

P100N-A

PUBLIC ORDER HELMET

- Fire & chemical resistant
- Impact absorbing, multi-layer aramid shell
- Adjustable ratchet at back
- Anti-fog pinlock visor insert

The P100N helmet from Schubert combines multiple layers of aramid composite with an EPS foam backing. When the helmet is attacked, the exterior aramid fiber layers delaminate (or separate), dissipating some of the force before it reaches the interior EPS foam. The process of delamination also means that any damage to the helmet is localized and ensures that the protective ability of the helmet will not be compromised after a single impact.

M100

BALLISTIC HELMET

A modern combat helmet, the M100 excels in both comfort and ballistic defense. Its innovative open architecture rail system and customizable interior deliver exceptional battlefield performance.

The M100 offers high ballistic protection, certified to meet or exceed NIJ Level 3A standards, ensuring robust defense against a wide range of ballistic threats in combat situations. An adjustable interior, provides a customized fit for each wearer and ensures both comfort and stability during prolonged dynamic activities. The M100's open architecture rail system enhances its adaptability, allowing for the attachment of various mission-critical accessories. The helmet's meticulous design places a premium on wearer comfort, reducing fatigue and optimizing focus and performance during missions.

LRAD
by Genasys

Genasys LRAD (Long Range Acoustic Device) systems deliver live or recorded voice messages with exceptional clarity for any operational scenario. Optimized to the primary range of hearing, LRAD's Advanced Driver and Waveguide Technology ensure every broadcast is clearly heard, even above crowd, engine, and background noise.

LRAD 100X

The LRAD 100X is a portable, self-contained communication system for on-scene and tactical use. It offers unparalleled vocal clarity and is up to 30 dB louder than megaphones, and other vehicle P.A. systems.

- **Superior Communication Range:** The LRAD 100X can communicate clearly over distances up to 600 meters.
- **Enhanced Safety and Compliance:** Helps enforce compliance and enhances safety during crowd control, search and rescue operations, and other critical missions, reducing the need for physical force.
- **Battery-Powered Operation:** The LRAD 100X operates on 8 hour rechargeable batteries, providing flexibility and ease of use in the field without the need for constant power supply.

LRAD 450XL

The LRAD 450XL utilizes technology developed and patented by Genasys Inc. to provide the audio output of larger acoustic hailers almost twice its size and weight, while delivering the same outstanding vocal clarity inherent in all LRAD systems.

- **Extended Communication Range:** Can project clear and intelligible communication over distances up to 2,000 meters, making it ideal for large-area coverage and long-range communication needs.
- **Rugged Design:** Rugged, military-tested construction built for all-weather use, ensuring reliable performance in various environments and weather conditions.
- **Powerful and Directional Sound:** Emits focused sound beams with high intensity and variable beam width for extended coverage, allowing operators to target specific areas or individuals with precision while avoiding collateral disturbance.

Scorpion PPE specializes in advanced blunt trauma guards designed to protect professionals in high-risk environments. These guards are meticulously engineered to absorb and dissipate impact energy, significantly reducing the risk of injury from blunt force impacts.

DFNDR Armor is committed to providing state-of-the-art personal protection solutions through continuous innovation and dedication to quality. Their mission focuses on providing state-of-the-art body armor that ensures the highest level of safety and tactical superiority for those who protect and serve.

VIEW ONLINE AT:

RIFLE SHIELDS

The DFNDR Armor® Lightweight Level III+ and Elite Ultra Lightweight Level III+ are designed with the operator in mind providing incredible maneuverability even in confined space situations. Offers handgun and long gun deployment on both right and left side maximizing operator options during engagements.

LIGHTWEIGHT LEVEL III+

Full System Weight, only 13.75lbs
Ballistic Core Thickness: 0.74"

ELITE ULTRA LIGHTWEIGHT LEVEL III+

Full System Weight, only 10.22lbs
Ballistic Core Thickness: 0.53"

M193 ICW ELITE SERIES

ULTRA LIGHTWEIGHT RIFLE RATED

The DFNDR Armor® M193 In-Conjunction-With (ICW) Elite Ultra Lightweight system is an incredibly thin lightweight body armor insert designed to defeat 5.56x45mm M193 Ball and 7.62x39mm Ball. Their M193 ICW rifle rated hard armor plates are designed with a multi-curve profile to provide an ergonomic and comfortable fitting armor system that is intended to be worn in front of IIIA soft armor.

EXPERTLY DESIGNED.
INDEPENDENTLY TESTED.

DFNDR LPC

LOW PROFILE CARRIER

The DFNDR LPC (Low Profile Carrier) system was designed to be used in a variety of applications. It can be worn covertly under clothing such as a sweatshirt or jacket but is fully modular and can be built-out to attach placards, comms, EUD's or their Enhanced Elastic Cummerbund for maximum load carriage.

Leading Technology Composites, Inc. (LTC) is a trusted manufacturer of protective body armor and vehicle armor systems for military and law enforcement. LTC provides lightweight, high-performance ballistic protection solutions that meet rigorous NIJ standards.

23620-2
LEVEL III STAND ALONE

A 10x12 multi-curve vest insert that is **certified N.I.J. 0101.06 Level III Stand Alone**. Manufactured from Ultra High Molecular Weight Polyethylene. Finished in a black Line-X coating.

LENGTH	11.8 in
WIDTH	9.6 in

ELYNXO

Elynxo provides advanced electro-optical solutions for military, law enforcement, and security users. Their Virtuose monocular combines optical vision, thermal imaging, a laser rangefinder, and target geolocation.

VIRTUOSE

The Virtuose is a multifunction monocular designed for military, law enforcement, and security operations, combining high-performance thermal imaging, direct optical magnification, and advanced geolocation capabilities in a compact, ruggedized design. Featuring a high-sensitivity 640x480 thermal sensor, a 7x direct optical path for daytime clarity, and a laser rangefinder with up to 3.5 km accuracy. Built to MIL-STD-810G and IP68 standards, it is lightweight yet durable, offering live video streaming, photo and video recording. With intuitive controls and an ergonomic design, the Virtuose is a versatile force multiplier for reconnaissance, surveillance, and precision targeting.

- Ultra Lightweight: Weighs just 950g (2lbs) including batteries
- Long Distance Range Finder: up to 3,500m
- Thermal image detection and situational awareness by day and night
- High weather resistance (IP68)
- Ultra-fast geolocalization positioning
- Built-in photo and video recorder
- Live streaming video
- Length: 14.3 cm, Width: 14.9 cm, Height: 5 cm

B.E. Meyers & Co. develops advanced optical and infrared targeting systems for military, law enforcement, and defense professionals. Specializing in cutting-edge laser technologies like the MAWL and DAGIR V2, with a focus on enhancing operational capabilities, B.E. Meyers designs products that deliver reliability and performance in complex tactical environments.

MAWL-DA

The MAWL-DA is a high-performance aiming and illuminator laser designed for individual carbines. Its modular body offers ambidextrous setup, ergonomic controls, and VCSEL-based laser performance, with multiple divergence modes for various engagement ranges.

- **Laser Class / Wavelength:** Class 3B, 860 nm IR and 520 nm visible green
- **Beam Divergence:** Pointer ~0.5 mRad; Illuminator up to 60°
- **Power Source:** 1× CR123A or 2× AA batteries
- **Weight & Dimensions:** ~10.5 oz with batteries; ~5.5" × 2.8" × 1.8"
- **Durability:** MIL-STD-810G compliant, waterproof to 20 m

DAGIR V2

The DAGIR V2 is a weapon-mountable aiming device and multi-spectral illuminator featuring both visible (green/red) and near-infrared VCSEL laser pointers, plus a variable divergence IR illuminator with onboard override capabilities. Built with rugged construction and rapid interface controls, it supports a wide range of platforms—from carbines to crew-served weapons and remote stations.

- **Laser Class / Wavelength:** Class 3B (green 520 nm, red 640 nm, IR 860 nm)
- **Output Power:** Green 1 mW–47 mW, Red 1 mW–165 mW, IR pointer up to 40 mW, IR illuminator up to 350 mW
- **Divergence:** ~0.5 mRad for pointer; illuminator ranges 0.8°–6°
- **Hazard Distance (NOHD):** ~258 m for green, ~615 m for red
- **Durability:** MIL-STD-810G, waterproof to 20 m for 2 hours; boresight retention within 0.5 mRad over 1,000-round weapon shock cycles

Night Vision Devices designs and manufactures high-performance night vision systems for military, law enforcement, and security users, delivering superior clarity and reliability in low-light conditions.

BNVD-SGC

This advanced night vision binocular features a single rotary control for power, gain, and auxiliary functions in a lightweight, ergonomic design. Built to MIL-STD-810H standards and submersible to 20 m, it includes an upgraded IR Spot/Flood illuminator, tactical monocular cutoff, and compatibility with Elbit, Photonis, and L3Harris image intensifiers in green or white phosphor.

- **Magnification:** 1× with 40° field of view
- **Focus Range:** 25 cm to infinity
- **Weight:** 520 g (18.3 oz) without battery
- **Power Source:** 1× AA battery, 25+ hours runtime
- **Durability:** MIL-STD-810H compliant, submersible to 20 m for 2 hrs

PVS-14

This versatile night vision monocular is the standard-issue device for the U.S. military and widely used by NATO forces. It can be handheld, helmet-mounted, or weapon-mounted behind compatible optics, offering both mobility and short-range targeting capability. Built to MIL-STD-810G standards, it is compatible with Elbit, Photonis, and L3Harris image intensifiers in green or white phosphor.

- **Magnification:** 1× with 40° field of view
- **Focus Range:** 25 cm to infinity
- **Weight:** 307 g (10.8 oz) without battery
- **Power Source:** 1× AA battery, 50+ hours runtime
- **Durability:** MIL-STD-810G compliant, submersible to 20 m

Pulsar offers high-performance thermal and night vision optics for hunters, security professionals, and outdoor users. Known for innovation and reliability, their devices deliver clear visibility in all conditions.

AXION XG30

Experience powerful thermal imaging in a pocket-sized format with the Pulsar Axion XG30 Compact Thermal Monocular.

- **Sensor:** 640×480 pix. @ 12µm (sNETD <25 mK)
- **Objective lens:** F30/1.2
- **Magnification:** x 2 – 16
- **Field of view (HxV), degrees** 14.6°

MERGER LRF XP 50

LRF XP 50 by Pulsar is a state-of-the-art thermal imaging device specifically designed for Law Enforcement. This multi-functional device combines thermal imaging and rangefinding capabilities, making it an essential tool for modern policing and tactical applications.

- **Microbolometer resolution (px)** 640×480
- **Frame rate (Hz)** 50
- **Sensor NETD, (mK)** <25
- **Pixel pitch (µm)** 17

GHOST HOOD®

GHOSTHOOD® specializes in multispectral camouflage systems engineered for operational use by military and law enforcement. Designed to suppress visual, NIR, and thermal signatures. Lightweight, modular, and mission-adaptable, these concealment tools provide reliable signature management in dynamic and static environments.

GHOST-HOODIE

The Ghost-Hoodie is a lightweight camouflage garment engineered for rapid deployment in reconnaissance, sniper, or surveillance roles. Built with CONCAMO® pattern.

- **CONCAMO® Visual Disruption:** Patented pattern uses 25-layered shapes to confuse the observer's subconscious and blend into natural surroundings
- **Visual and NIR Concealment:** Reduces detection in the visual and near-infrared spectrum
- **Integrated Visibility:** Mesh eye slit provides unobstructed field of view during observation or engagement
- **Vegetation Integration:** Elastic CFIX loops for attaching foliage and enhancing environment-specific concealment

RECCE-NET

The Recce-Net is a multispectral camouflage net designed for static concealment of personnel, optics, and equipment. Printed in CONCAMO®, it provides lightweight, field-ready protection against visual, NIR, and thermal detection across operational environments.

- **CONCAMO® Camouflage:** Chaotic, layered pattern engineered to visually deceive both human and animal observers
- **Multispectral Concealment:** Suppresses detection across visual, infrared, and thermal spectrums
- **Coverage Versatility:** 2.8 × 2.8 m format ideal for concealing operators, rifles, optics, and gear
- **Optics-Ready Cutouts:** Slits positioned for use with rifles, scopes, antennas, or range-finding devices

TRY BEFORE YOU BUY

TEST & EVALUATION PROGRAM

Nothing compares to experience when you're trying to understand a product. Our T&E Program offers you the opportunity to acquire sample products on a trial basis so you can feel confident you're making the right decision. There are 2 levels of our T&E Program:

- 1. Non-Destructive:** Rampart USA will send prospective agencies a sample* to get a hands-on feel for quality. The product is then sent back after an evaluation period.
- 2. Destructive:** Purchase a sample product at a reduced rate. The product is then yours to keep to fully test out its capabilities and take the required time to make a confident buying decision.
